

ABOUT US

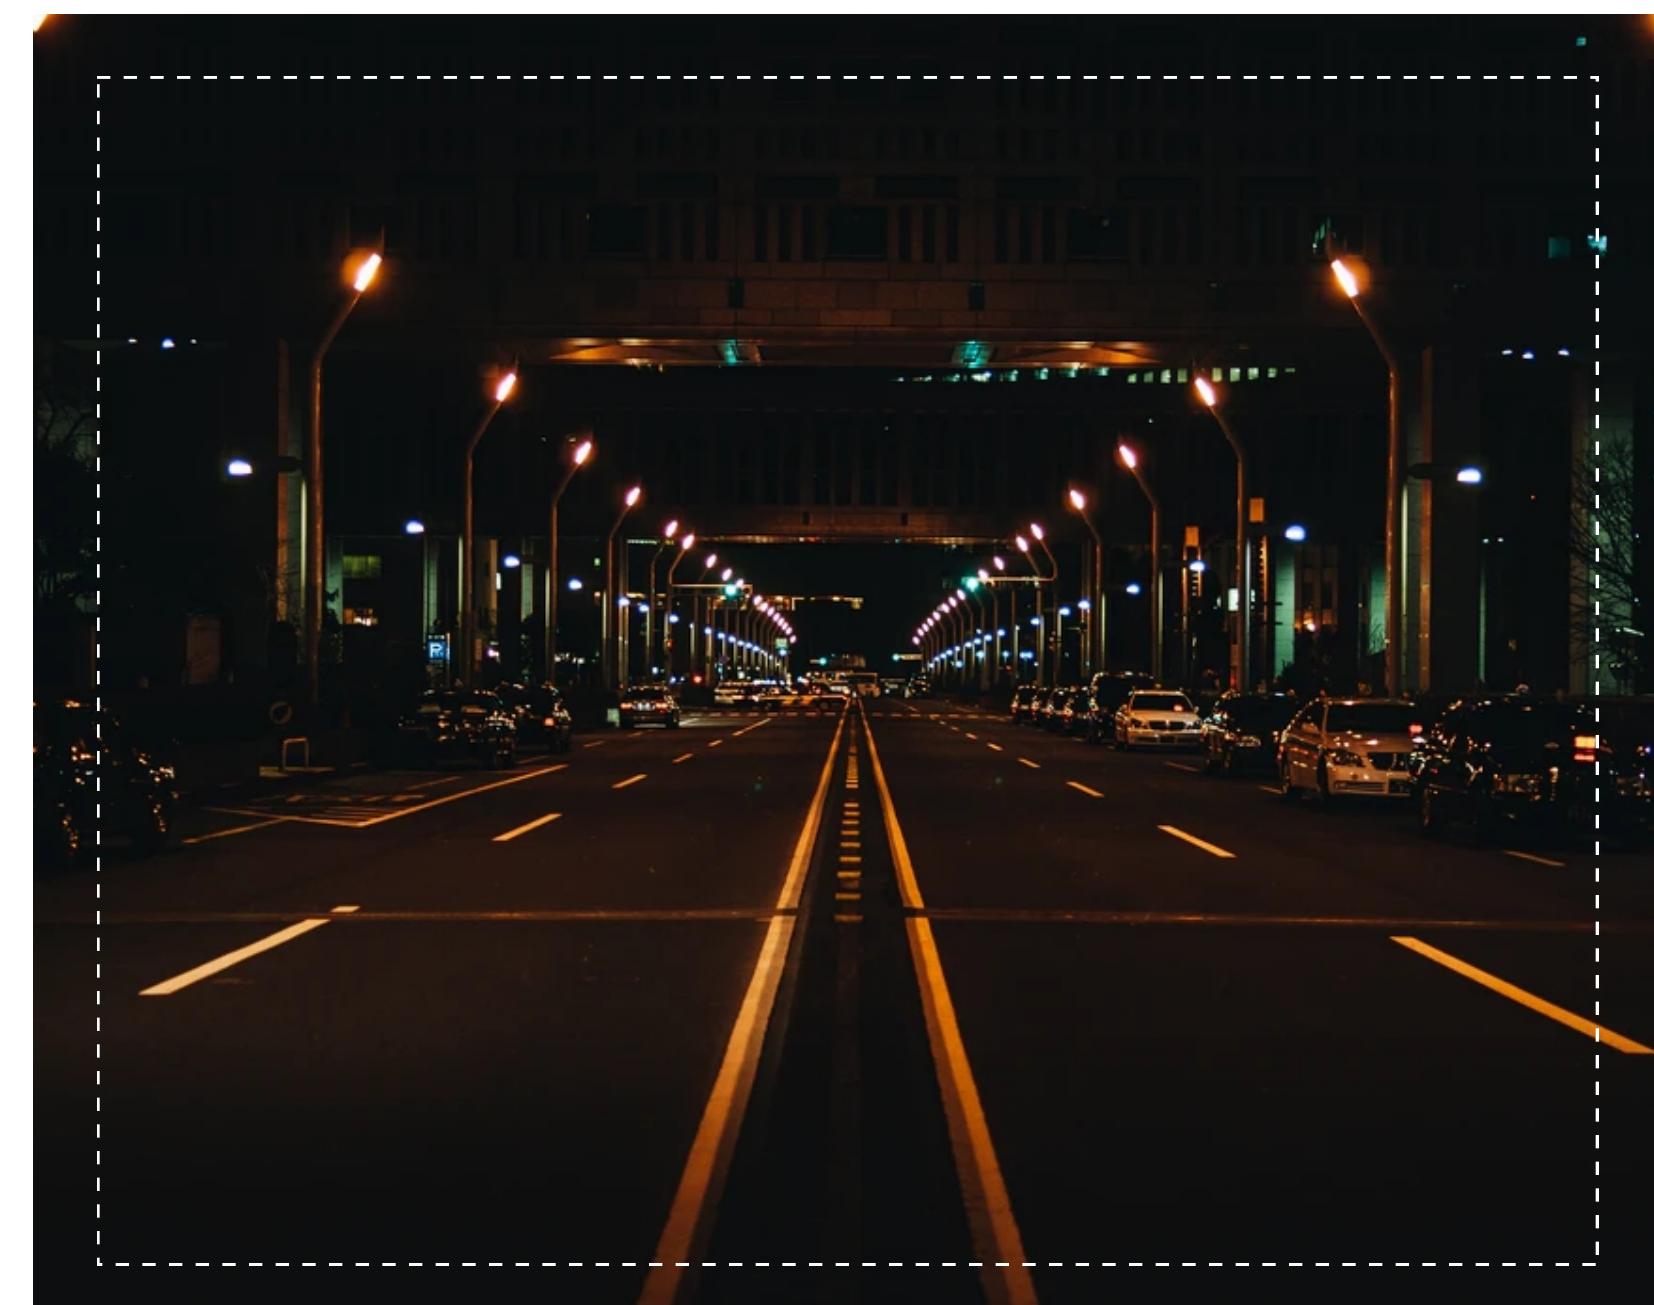

Home > About Us

Welcome to Power Trust Uganda Ltd

Power Trust Uganda Limited is a privately owned company, established in 2011 to serve the needs of the growing energy sector by supplying appropriate environmentally friendly products and services.

Power Trust is a service company dealing in sourcing, supplying, installation and servicing of solar PV systems, solar water heaters, power backup systems, streetlights, water pumping solutions and electrical works.

Our network of reputable international manufacturers ensures that the products and services offered to the community are of the best performance and quality standards; as such, honesty, trust, and expertise have won us a good reputation across the region as a contractor of choice for solar & electrical energy solutions.

VISION

To be the leading provider of clean energy solutions in Eastern & Central Africa

MISSION

To provide innovative and affordable clean energy solutions relevant to our clients' needs with the highest professional standards

CORE VALUES

- Teamwork
- Quality
- Integrity
- Environmental Protection

Water Pumping Solution & Plumbing Works

Solar PV Installation & Maintenance

Our installations are carried out by highly experienced and competent technical team who ensure that quality installations are done with safety as a pre-requisite. Prior to installations our Engineers carry out system sizing and design, and ensure that the best materials and equipment are supplied to our clients.

Our technical team always follows installation guidelines and procedures during installation and testing, commissioning, and training of users is involved before systems are powered on. For PV systems to work efficiently and achieve their design life, effective operation and maintenance of the systems is fundamental and Power Trust often conducts preventative operation and maintenance of all the systems installed by the company which helps in ensuring optimization of the systems performance for a longer life.

Monocrystalline Solar Panels

The monocrystalline solar panels range from 5-600 watts and are made from many smaller solar cells, each from a single wafer of silicon, so they appear smooth and even.

The long silicon rods are wired together in the solar panel making them most efficient solar technology with a minimum lifespan of 25 years.

	Specifications	Features	Reviews
Temperature Coefficients of Isc (%) C	0.056	Allowable Hail Load	23m/s ,7.53g
Temperature Coefficients of Voc (%) C	-0.33	Junction Box Type	Pass the TUV Certificate
Temperature Coefficients of Pmax (%) C	-0.43	Front Cover	Low-iron tempered glass
Nominal Operating Cell Temperature (NOCT)	45±2°C	Cable & Connector Type	Pass the TUV Certificate
Operating Module Temperature	-40°C to +85°C	Backing (Brand Type)	TPT
Power Tolerance	±3%	Standard Test Conditions	AM1.5 1000W/ 25 +/-2°C
Surface Maximum Load Capacity	2400Pa	Frame	Anodized aluminium alloy
Warranty	20 years Product Warranty,30 years linear power output warranty.
